9	Fuel Price Fluctuation: During the contracted period, the freight rate revision due to fuel price variation will be in the proportion of fuel component of the total freight cost as illustrated below. The base rate or reference rate of diesel will be considered as "the rate of diesel" on the date this RFQ is floated. The fuel component will be considered as 45% of total freight cost. Up to 5% cumulative increase or decrease: There will be no change in the freight. More than 5% cumulative increase or decrease: The revision in freight rate will be based on the following equation :- Revised rate = Existing rate + (existing rate X % change in diesel X 45%) For example: Rate of Diesel on RFQ date (Base Rate) - INR 97.28 1) Rate of Diesel on xx date - INR 101 ==> There will be no change in contract rate 2) Rate of Diesel on xx date - INR 105 ==> Revised Rate = 5000 + (5000 x 7.94% x 45%) = 5,179
10	The Customer shall insure the Cargo & Container against all risks appropriately.
